    - Continue implementing the rest of the code
    - Balance interface
    - Summarize Bugs
  - Issues/Obstacles
    - Errors that are difficult to notice
    - Not enough experience in using proficient tools leads to not being able to complete some tasks in the previous sprint
    - Misinterpret requirements and adjust in a short period of time
- Phùng Tố Uyên + Nguyễn Cát Huy
  - Completed tasks
    - UI prototype
    - Revised Software Architecture document
  - To-Do tasks
    - Test plan and test cases
    - Complete the Product

- Defects detection
- Balance interface
- Continue implementing the rest of the code
  - Issues/Obstacles
    - Lack of communication between members
    - Haven't completed tasks from previous sprint
    - Bad work and study time management

Summary of the meeting:

- Every team member should work to speed up progress and enhance overall performance
- Team members are encouraged to support each other with challenging parts of tasks when possible.
- Close connection between members and improve the sense of responsibility
- Assign specific tasks to each member and require stricter work progress
- Focus on finding software errors and incorporate them into PA implementation plans
